MEMORANDUM

TO: Directors and Fiscal Officers of All Departments, Agencies, Boards and Commissions

FROM: Timothy S. Keen, Director

DATE: November 14, 2011

RE: Emergency Capital Appropriation Request Process

Background
Section 503.95 of HB 153 (see attachment) permits the Director of Budget and Management to request and the Controlling Board to authorize emergency capital appropriations to meet critical capital funding needs of state agencies and institutions. This memorandum identifies the process that has been established for agencies and institutions to submit requests as well as the required supporting information.

Process for Application and Supporting Materials

1) Any state agency which has historically received appropriations from any of the funds identified in the attachment may submit to the Director of Budget and Management a request for consideration to recommend to the Controlling Board a request to establish appropriations to meet urgent or emergency capital facilities needs which inhibit the ability of the agency or institution to properly carry out its mission and for which it is determined by the Director of Budget and Management that no reasonable alternative source of funding exists to support the facility need. In making such an application the eligible agency or institution shall make its request in writing to the Director of Budget and Management and provide the following information with the request:

   a. A detailed description of the request, including the estimated cost, and the specific urgent or emergency capital facilities need that exists. Included in this detailed description should be rationale as to why funding for the request cannot wait to be taken up as part of the regular capital planning and funding consideration process.

   b. A detailed explanation of how the current state of the facility or facilities or project in question inhibits the ability of the agency or institution in effectively carrying out its responsibilities/mission and how it is impractical or impossible to wait and address the facility need through the regular capital planning and appropriation process.
c. A detailed explanation of why no other resources are available for addressing the urgent or emergency capital facility needs. This explanation should include, but not be limited to, an explanation of why existing capital appropriations to the agency or institution could not be redirected in order to address the urgent or emergency need with the project from which the funds were redirected receiving replacement appropriations through the regular capital planning and appropriation process.

d. Such other information that the Director of Budget and Management requests following the initial submission of the written request or such other information that the agency or institution believes will fully inform the Director of Budget and Management in his consideration of the application.

2) Following a review of the application, including all information required or requested under items 1a through d, the Director of Budget and Management will inform the agency of his decision and if appropriate, submit a request to the Controlling Board to authorize the establishment of the appropriation at the Controlling Board’s next regularly scheduled meeting.

Establishment of Appropriation and Completion of Project
Once the Director of Budget and Management makes a recommendation for funding and the Controlling Board acts favorably on this recommendation, appropriations will be established for the agency to undertake the emergency actions necessary. Once the urgent or emergency project identified in the application is complete, the balance of the appropriation will lapse, unless the agency can satisfactorily demonstrate to the Director of Budget and Management that it should be used for other purposes, including, but not limited to replenishing appropriations previously redirected to address urgent capital needs.
