State of Ohio
Capital Planning and Budget Submission Guidance
Fiscal Years 2015 – 2020

Institutional Agencies
Ohio Office of Budget and Management
MEMORANDUM

TO: Directors and Fiscal Officers of All Departments, Agencies, Boards and Commissions

FROM: Timothy S. Keen, Director

DATE: September 26, 2013

RE: State Capital Improvements Planning for FYs 2015-2020 and the Capital Budget for FYs 2015-2016

Attached to this memorandum is the Office of Budget and Management’s (OBM) guidance to state agencies for capital improvements planning for fiscal years (FYs) 2015-2020 and for preparing capital budget requests for FYs 2015 and 2016. This guidance deals only with the new capital budget and your agency’s six-year capital improvements plan. OBM will also establish a capital reappropriations process for FYs 2015 and 2016, on which you will receive separate written guidance later this year.

Capital bill appropriations directly impact operating budgets via debt service payments on the bond issuances used to support capital expenditures. Therefore, consistent with Governor Kasich’s commitment to restrain government spending, it is imperative that expenditures in the FYs 2015-2016 capital biennium also be restrained. Accordingly, the bill will focus on necessary maintenance and upkeep of the state’s current capital assets and will require an extremely high threshold to justify funding of new construction.

Capital Planning and the Capital Bill
In order to prepare a new capital appropriations bill and comply with the capital planning provisions of Section 126.03 of the Revised Code, agencies must prepare and submit to OBM their six-year capital improvements plans. Thus, all state agencies, colleges, and universities should use the preparation of their six-year capital plan and their two-year capital funding request as an opportunity to carefully review their capital needs and to request funding only for those projects that are most essential. In doing this, agencies should examine their capital facility needs with respect to their current operations, while bearing in mind those ways their mission and services will evolve over time. In conducting this review of capital needs, it is essential that agencies carry out proper planning and provide the best possible cost estimates to OBM. To accomplish this, it is strongly recommended that agencies use the services of the Ohio Facilities Construction Commission to assist in development of their six-year plans.
After reviewing agencies’ plans, the Administration will develop a two-year capital budget recommendation and the necessary capital-related legislation. This budget will be ready for introduction to the General Assembly early next year, according to OBM’s current timetable. More information about the timetable is provided in the attached guidance.

Previously authorized capital appropriations will expire on June 30, 2014 and, to the extent that agencies request, may be considered for reappropriation for FYs 2015-16 as part of the aforementioned reappropriations bill process. Similar to the reappropriation process followed for FYs 2013-14, agencies will be directed to thoroughly review their existing capital appropriations balances and to coordinate any requests for reappropriations with the six-year capital plan that will be submitted for FYs 2015-20.

**Separate Capital Processes**
Outside the state agency process outlined in the attached guidance, there will be two other processes used to complete development of the capital budget. Following the successful process he established in the last capital bill, Governor Kasich will again challenge state colleges and universities to collaboratively determine capital priorities across the University System of Ohio. This process may generate additional requests for information from those institutions, and the related timelines may differ from dates in the general guidance. Additionally, we have made a judgment that the state’s financial condition is such that a small portion of the capital budget can support targeted economic development projects of local or regional importance. OBM will coordinate a separate process to receive and review such recommendations for possible inclusion in the capital bill.

**Questions About the Guidance**
You will notice that a number of changes have been made to the capital improvements planning guidance from previous years. Should you have any questions about the guidance and the changes that have been made, please contact your OBM budget analyst. We greatly appreciate your help and cooperation.

Attachment

     Beth Hansen, Chief of Staff  
     Wayne Struble, Governor’s Office Director of Policy  
     Christopher A. Whistler, Assistant Director, OBM
Executive Summary of the Guidance for Institutional Agencies

All agencies that anticipate capital needs during FYs 2015-2020 must submit a long-term capital improvements plan for the period beginning July 1, 2014 and ending June 30, 2020.

The purpose of the capital improvements plan is to communicate in a clear and concise manner the capital needs of the agency. It is used by OBM and the Governor to make allocation decisions.

While agencies have some discretion as to how they present their six-year capital plans, all requirements contained in these guidelines must be met. Agencies may meet with OBM analysts to discuss alternative formats to facilitate analyst review and agency preparation. Additionally, OBM may also consult with the Ohio Facilities Construction Commission to discuss and evaluate an agency’s submission and formulate recommendations.

As in the past, OBM may schedule follow-up meetings after agencies have submitted their requests.

Agencies must complete and submit:

- Introductory Narrative
- Agency Overview
- Institutional Profile and/or Community Project Profile
- Table C-1 for Each Project
- Narrative for Each Project
- Appropriate Supporting Documents
- Summary of Agency Priorities
- Response to Capital Facilities Management Survey

Once the capital improvements plan has been reviewed by OBM for completeness, agencies will be notified to submit five additional copies. These copies are for internal OBM use and for distribution to the Legislative Service Commission, Ohio Senate, Ohio House of Representatives and the Ohio Facilities Construction Commission.

| Appendix H                              | Definitions of Project Type        |
I. Introduction

Every two years, state agencies must submit to the Office of Budget and Management (OBM), in accordance with Section 126.03 of the Ohio Revised Code, a six-year capital improvements plan (CIP) and a two-year capital budget request. The capital improvements plan and two-year capital budget request are intended to ensure that the state’s previous investments in existing infrastructure are maintained and to address the need for capital projects that may be warranted for other reasons. The capital budgeting process is designed to allocate limited resources for the rehabilitation, renovation, and construction of facilities that are integral to the operations of state government.

For the purpose of this process, “capital” is defined as the cost of acquiring, constructing, reconstructing, rehabilitating, remodeling, renovating, enlarging, improving, and/or equipping facilities. A more specific explanation of how capital appropriations can be used is found in Section 509.10 of H.B. 482, the most recent capital appropriations bill. If an agency is not sure whether a particular project is a capital project, the agency should consult with its OBM analyst.

The following guidelines provide both a general framework and detailed instructions for agencies’ use in preparing their capital improvements plans. The plan the agency submits should be as clear and complete as possible because it is intended to communicate the agency’s needs to OBM.

The Role Of OBM

Typically, as in any budget process, the demand for funds exceeds the amount of resources available. The role of OBM, therefore, is to determine the amounts available for capital appropriations, and create a capital budget proposal that reflects the Governor’s priorities and addresses the needs of state agencies within available resources.

The OBM budget analyst assigned to your agency is the key OBM resource regarding an agency’s capital request. Each analyst’s knowledge is dependent on the ability of the agency to communicate its vision, environment, and needs. Requests should be structured so that they may be clearly understood by the analyst, and agencies should work closely with the analyst to provide any necessary supplemental information.

Recognizing there is a limit on the overall amount available for capital appropriations, agencies should focus their requests on projects of the highest priority. As a result, OBM may, for some agencies, impose limits on the dollar amounts included in an agency’s request. Alternatively, some agencies may be asked to present capital funding “scenarios” for the first biennium (FYs 2015-2016). These scenarios will be structured around specific dollar amounts and are designed to help OBM more fully understand an agency’s priorities. These scenarios or limits should not be interpreted to mean that an agency is guaranteed any particular level of funding, but instead that OBM needs to know the impact on agency needs.
at various funding levels. For more information see “Scenarios and Limits” on page 12.

Each agency is encouraged to work closely with its budget analyst to determine if there is any information the analyst requires in order to better understand the agency’s request and plan. The OBM analyst, after reviewing the agency request and consulting with Ohio Facilities Construction Commission, may determine that a meeting between the OBM analyst, OFCC and agency representatives is necessary to understand the agency’s request and plan. Appendix I consists of several examples of support OFCC offers agencies in the development and review of capital requests.

**Multi-Agency Projects**

From time to time, capital projects that involve more than one agency are raised for consideration. Agencies interested in pursuing or continuing projects that involve multiple agencies should inform their OBM budget analyst as soon as this information is available. OBM will then coordinate discussions to determine the proper submission of the request.

**Due Dates and Effective Dates**

- **All Agencies: Due November 15, 2013**

Appropriations for capital expenses are effective 90 days after the Governor signs the bill and it is filed with the Secretary of State. The last capital bill went into effect July 2012 (signed by the Governor in April 2012). It is likely the next capital bill will be introduced in the spring of 2014 with an effective date in the summer of FY 2015.

**Capital Reappropriations**

The capital reappropriations process involves identifying which current capital projects need to be reappropriated. OBM will be sending instructions to agencies regarding the reappropriations process later this year and expects requests to be returned in early January 2014. The reappropriations bill will most likely be introduced in mid-February 2014 so that it may be enacted and signed by the Governor by March 31, 2014 in order to be effective July 1, 2014. As mentioned in the cover letter from the Director of Budget and Management, not only will extra scrutiny be given by OBM to requests for reappropriation of capital balances, but as part of their capital planning process, agencies should revisit existing capital appropriations and determine the extent to which appropriations still exist for projects that are no longer priorities. Agencies should then take the availability of such balances into account when developing their two-year capital budget request and six-year capital plans.
II. KEY POINTS

There are several key points that agencies should pay particular attention to as they prepare their requests.

**Table C-1 covers all biennia.** Table C-1, which is described in more detail on page 1 of Appendix B, covers all three capital planning biennia. Funding requests for projects that span more than one biennium should be made on one Table C-1.

**Request new appropriations only.** Agencies should only submit requests for new capital appropriations. The reappropriations process will be handled separately. Instructions for reappropriations will be sent to agencies in the near future.

**Administrative office space is requested by DAS.** All agencies seeking funding for additional administrative office space (excluding administrative office space on institutional property) should submit the administrative office space requests to the Department of Administrative Services (DAS). DAS will then review and submit the requests to OBM. Agencies that think they need additional space should contact the DAS Office of Real Estate and Planning at (614) 466-7319.

**Cost estimates should include all funding sources in FY 2014 dollars.** Estimated cost information provided on Table C-1 should include all funding sources for the project. The cost estimates, which include all costs relevant to the project, should be given in FY 2014 dollars. As OBM may consult the Ohio Facilities Construction Commission in its analysis and evaluation of agency requests, it is strongly recommended that agencies use the Ohio Facilities Construction Commission to evaluate the proposed project scope and develop cost estimates. Cost estimate methodologies will need to be included in project description narratives. Agencies needing assistance should contact William Ramsey, Chief of Planning, at the Ohio Facilities Construction Commission at bill.ramsey@ofcc.ohio.gov or (614) 387-1270.

**Ohio Facilities Construction Commission fees are on a sliding scale.** Fees charged by OFCC are assessed on a sliding fee schedule. Agencies must include these fees in their project cost estimates. Refer to the Estimated Costs Section in Appendix B for more detailed information concerning these charges.

**Contingency cost varies by project type.** The rule of thumb is that contingency costs as a percentage of the construction costs for new construction usually amount to 5 percent of construction costs and fall in the 8 to 10 percent range for renovation projects. The Ohio Facilities Construction Commission can assist agencies in evaluating contingency costs for their specific projects.

**Agencies should not include Percent for Arts Costs in project costs.** Funding for the Percent for Arts program (see Ohio Revised Code Section 3379.10) should not be included on the Table C-1. OBM will calculate this amount once funding recommendations are final. (See Appendix G for a summary of the Percent for Arts Program.)

**Introductory narrative should focus on priorities and choices.** The agency’s introductory narrative should focus on the key decisions made by the agency in putting its capital request together. The introductory narrative should address the choices and/or trade-offs that were made
by the agency in deciding its funding priorities and how the needs of the agency’s constituents are reflected in the capital request. The Ohio Facilities Construction Commission can assist agencies with the evaluation of their current long term capital plan, review and prioritization of capital projects, and development of supporting rational for the capital request. Agencies requesting assistance should contact William Ramsey, Chief of Planning at the Ohio Facilities Construction Commission at bill.ramsey@ofcc.ohio.gov or (614) 387-1270.

**Funding scenarios may be required.** Due to the size and complexity of some agencies’ capital requests, certain agencies may be asked to provide scenarios of which projects an agency could or would include at various funding ceilings.

### III. REQUEST COMPONENTS

Institutional agencies should prepare their capital improvements plans to cover the information outlined below.

**CAPITAL BUDGET REQUEST COMPONENTS**  
*(Checklist for Institutional Agencies)*

- [ ] Introductory Narrative
- [ ] Issues and challenges
- [ ] Decisions, choices and tradeoffs
- [ ] Changes in the number or types of clients

- [ ] Profile for Each Institution
  - Physical facilities (map)
  - Population served
  - Annual operating cost

- [ ] Community Capital Projects
  - Description of community capital needs and projects
  - Justification for state capital assistance
  - Explanation of funding methodology
  - Implications for state subsidies

- [ ] Table C-1 for Each Project

- [ ] Narrative for Each Project
  - Description
  - Justification
  - Project Phasing Illustration
  - Cost Estimate Methodology
  - Additional Information

- [ ] Priority List
- [ ] Response to Capital Facilities Management Survey
Early in the process, agencies and their OBM analyst will discuss whether there is any additional information that should be provided as part of the agency’s capital request. Analysts may ask that information be presented in alternative formats, or in aggregated formats that will help gain a better understanding of the request. Any information that an analyst and agency agree can be provided should be submitted as part of the request.

**Introductory Narrative**

The introductory narrative should be written to help OBM understand the thought process behind the agency’s capital budget request and priorities. Agencies should prepare an introductory narrative that includes the information listed below in whatever format is appropriate.

| **Agency Strategy and Goals** | Describe the strategy behind the agency’s capital request. What are the agency’s immediate and essential capital needs? What are the long-term goals for the capital budget? |
| **Agency Priorities: Decisions and Trade-offs** | Describe the decisions, choices, and tradeoffs the agency made in putting together its capital request and in assigning priority rankings to projects. What will be the consequences of these decisions and choices for the agency? What factors were considered in prioritizing projects? |

**Institutional Profile**

An institutional profile should be completed for each institution and should include a description of the physical facilities, population served by the facility, and annual costs associated with operating the facility. The Ohio Facilities Construction Commission can assist agencies in developing or updating their facilities assessment. Agencies needing assistance in developing or updating their institutional profiles should contact William Ramsey, Chief of Planning, at the Ohio Facilities Construction Commission at bill.ramsey@ofcc.ohio.gov or (614) 387-1270.

**Physical Facilities** This section should describe the institution’s physical facilities and provide the information listed below:

- The year the institution was created and its original purpose.
- The current design capacity of the institution.
- The number of buildings, their use, age, general condition, and the type of construction. For example: The facility includes six buildings. The administration and foodservice building is a brick structure with a flat roof constructed in 1965 and is in good overall condition. The two dormitories and the gymnasium are pre-fabricated concrete block and metal structures with gable (slanted) roofs constructed in 1972 and are in need of a roof replacement. The
remaining two buildings are small wood structures used for counseling and education, were constructed in 1988 and are in good condition.

- A brief description of the major capital renovations or additions currently underway at the facility or completed during the last six years. (For example: “A new roof is currently being installed on the administration building. Two new pre-fabricated dormitories were completed in 1996.”)

- A map of each institution's grounds and buildings. A key that identifies all major buildings should accompany the maps.

**Population Served**

This section should describe the institution’s client composition and provide the information listed below:

- The average daily client population at the facility during FY 2013. (If the average daily population is not available, cite the population as of July 1, 2013.)

- The type of client served. Note factors that would distinguish clients in the institution from clients in the agency’s other institutions. For example: The institution is a short-term transitional facility, serving clients who are expected to begin living independently.

**Operating Costs**

This section should describe the costs involved in operating the facility.

- The actual FY 2013 per diem cost at the facility. (Per diem = FY 2013 operating expenses divided by FY 2013 average daily population divided by 365)

- If the per diem is significantly higher or lower than other facilities explain why. For example: Costs at this facility are higher than at other facilities because it is a maximum-security institution requiring a high staff-to-inmate ratio.

**Agency Community-Based Capital Projects**

The Departments of Rehabilitation and Correction, Youth Services, Mental Health and Addiction Services, and Developmental Disabilities, should submit the following information for any agency community based programs included in the capital budget submission such as Community-Based Correctional Facilities; Local Juvenile Community Correctional Facilities; Local Juvenile Detention Centers; Local Jails; Halfway Houses; and Community Assistance Projects.
Program Overview

- State the goal(s) of the program and the type of clients served.
- Outline the implications that each program has for its respective agency in terms of the number of clients to be diverted or transferred to community-based facilities.
- Summarize the qualifications necessary for community agencies to participate in the programs.
- Provide an inventory of community facilities funded under the program that are either operational or will be built with existing appropriations. Include their capacity (number of beds and/or annual number of clients served) and location (by county).
- For community-based residential facilities, state the average occupancy rate (or use the most recent data available) of existing facilities in FY 2013 and compare the operating cost of maintaining a client in community-based facilities with the cost of maintaining a client in a state-owned and operated facility.

Outstanding Needs

- Provide an estimate by county or region of the number of people that need services but will not receive them due to a lack of capacity in existing facilities and facilities to be built with existing appropriations.
- Summarize the data and assumptions used in generating the above estimate of community capital needs.

Proposed New Projects

- Agencies are reminded that very limited resources will be available for new capital projects. Funding will likely be focused on the repair and maintenance of current facilities and the continuation of existing projects. OBM requires the use of the Ohio Facilities Construction Commission to evaluate new construction versus renovation for capital projects for all agencies not specifically exempted in statute.
- For proposed new projects, estimate the amount of the requested funding that will go to each facility each biennium. Describe the type of facility, the number of beds and/or clients the facility serves or will serve, the type of work to be completed, the current condition of buildings to be renovated, and the location of the facility (by county).
- Estimate the effect of the proposed community project on state subsidies.
Project Statements (Table C-1)

Table C-1 provides detailed information on each capital project requested by an agency. A Table C-1 and detailed instructions on completing the table are provided in Appendix B.

The Table C-1 is available online in Excel format at OBM’s website (http://www.obm.ohio.gov/sectionpages/budget) under the capital budget tab, capital budget materials FY 2015-16. Agencies may also contact their OBM analyst to obtain the file.

Agencies will need to print the completed Table C-1s and submit them to OBM, as part of their capital plan submission.

Table C-1 Narrative

Agencies must complete a narrative for each Table C-1. The narrative should consist of a project description and a project justification, which are described below. In addition to the information requested below, agencies should use the narrative to tell OBM anything else that should be known and considered when OBM evaluates the project. Since agency capital needs vary in size, complexity and in the nature of projects, agencies should work with their budget analyst to clarify specifically what needs to be included in the Table C-1 narrative.

**Description:**
What is the purpose, dimension, components, capacity, and location of the project?

The project description should be a general discussion of the project that includes the general purpose(s), the overall dimensions, a list of the major components, some indications of the capacity (number of beds, work stations, etc.), and the specific location of the project. For a renovation project, the description should also include the age and current condition of the building as well as the date of the last renovation.

An example would be: *Construction of a three-story 36,000 square foot classroom facility on the southeastern portion of the campus which includes sixteen 50 seat classrooms, 5,000 square feet of laboratory space and 1,000 square feet of administrative office space.*

**Justification:**
What is the need for, benefits of, funding impact of, and alternatives to the project?

The project justification should answer the following questions: Why is the project needed? What are the benefits of the project? What will be the impact of not funding the project? If the proposed project represents one of several solutions to a need or a problem, what other alternatives were considered and why weren’t they chosen?

Certain projects will be readily justifiable because the need will be immediately apparent. For example, if a plumbing system needs to be replaced because it is 30 years old, leaking, and replacement would be more cost effective than repair, then a justification stating those facts would suffice. Energy efficiency projects may be justified by meeting the
criteria for capital funding, demonstrating how the project will help achieve operational cost savings (see Special Project Information below).

<table>
<thead>
<tr>
<th>Project Phasing: Can the project be completed and funded in phases?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Frequently, when OBM must recommend funding levels that are less than what an agency requested, the suggestion of phasing certain projects is offered as a solution. These projects are typically large renovations and new facilities. The agency should identify in its request which of those projects being requested in the first biennium could be phased in over two or more capital biennia. The agency should answer the following questions: Could this project be completed in phases? Does it make sense to approach the project this way? What is the impact of this project being phased over more than one biennium?</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Cost Estimate Methodology: What method is being used to estimate project costs?</th>
</tr>
</thead>
<tbody>
<tr>
<td>In order to properly allocate and effectively utilize capital dollars, cost estimates must accurately reflect complete project costs. Unless an agency has a specific statutory exemption OBM thus requires the use of the Ohio Facilities Construction Commission as a resource for determining project costs and selecting a reasonable cost estimate methodology. Two suggested cost estimating techniques are detailed construction cost and historical cost estimating, briefly described below:</td>
</tr>
<tr>
<td>Detailed estimating methods are employed whenever adequate design information is known or can be reasonably assumed. Detailed construction estimates are calculated knowing that the sum of the cost of the parts must equal the cost of the whole. Therefore, every cost associated with the project is estimated and the results are totaled.</td>
</tr>
<tr>
<td>When such information is not available, historical cost estimating can be utilized. When details cannot be reasonably assumed, then prices for similar work already completed can be updated using published factors to account for inflation and reapplied to new estimates. Adjustments should be made using professional judgment to account for various factors such as differences in construction site location and significant variations in the magnitude of quantities.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Additional Information: Is there anything else that needs to be known?</th>
</tr>
</thead>
<tbody>
<tr>
<td>There may be additional information that is important to understand the value of the project. If this is the case, include it in the justification section of the narrative. Some examples of pertinent information include job creation and economic development and contribution to program goals and objectives.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Special Project Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>If any box in the Special Project Information section of the Table C-1 is marked, the justification should explain how the project addresses these</td>
</tr>
</tbody>
</table>
special conditions. See Appendix B for a detailed description of each Special Project Information box. Certain Special Project Information categories should include specific information in the C-1 narrative and are listed below.

**Energy Efficiency:** If the Energy Efficiency box is marked, document how operating costs will be affected over the period of the investment and indicate when payback will occur. These projects should be coordinated with the OFCC Energy Services Office. Agencies planning energy efficiency projects should contact the OFCC Energy Services at (614) 466-6290.

**Life & Safety:** If the Life and Safety box is marked, provide details on how current conditions pose imminent threats to the health and safety of Ohio’s citizens, and how the project will correct them.

**Legally Mandated:** If the Legally Mandated box is marked, attach supporting documentation (e.g., copy of the mandate).

**ADA Funding:** The ADA box should be checked if an agency is requesting a project exclusively for compliance with the requirements of the Americans with Disabilities Act and provide supporting information in the Table C-1 narrative.

**Prior Funding:** If the Prior Funding box is checked, the narrative should include: the fiscal year in which the first appropriation for this project was made, total funds appropriated for the project since the original appropriation, and how these funds were or will be used.

For example: *Funds were originally appropriated in the FY 09-10 biennium. A total of $3.4 million has been appropriated, including transfers. These funds were used to complete Phase 2, which involved replacing all the chillers and steamlines in the North Building.*

---

**Priority Summary**

Agencies must prepare a list of their requested projects in priority order. Agencies must use the spreadsheet format that OBM has prepared. It can be obtained from your OBM analyst (along with the Table C-1). If using the OBM spreadsheet is impractical due to system or software incompatibility, the agency should contact its budget analyst to find an alternative means to produce the Priority Summary. A printed copy of the list and copy of the spreadsheet file must be submitted as part of the agency’s capital plan submission.
**Scenarios and Limits**

Those agencies that have a significant number of capital projects and have historically requested significantly more than what has been made available, may be asked to provide information that will help OBM better understand what projects would be funded at specified dollar amounts. These agencies will be asked to create a scenario for one or two specified dollar amounts. The scenario should be included in the appropriate column on the Priority Summary discussed above. Scenario amounts will be made available several weeks prior to an agency’s submission due date. For some agencies, an overall funding request limit may be imposed.

**Capital Facilities Management Survey**

Appendix F consists of several questions that agencies should answer as part of their capital budget submission. The questions pertain to the agency’s facility inventory, condition assessment practices, and how the agency determines and schedules facility maintenance.
APPENDIX A
ELEMENTS OF AN EFFECTIVE REQUEST

This appendix highlights common elements found in effective capital budget requests. It has been written especially for agencies and staff preparing a capital budget request for the first time, however, agencies and staff with considerable capital experience may also find it useful. While some factors outside the agency’s control determine whether or not a request or project is funded, including the elements discussed below in your agency’s request will likely increase the chance that a proposal will be considered favorably.

*It is important that your proposal be timely, complete, informative, and concise. Succinctness and clarity are key factors. If it takes lengthy documentation to identify the public need and justify your solution, provide the detail as clearly cross-referenced attachments.*

- Give the request a succinct descriptive project name. It is helpful to have an easily identifiable project name for reference purposes for questions and discussions. This name is used by OBM and in various levels of the Administration’s budget discussions.

- Provide a clear and concise summary of the request. This should be a brief statement of what is being requested and why. This description should provide the minimum level of detail necessary for request discussion and decision meetings. An effective request summary is brief, yet clear enough so that it can stand-alone. Additional detail should be contained in the request documentation.

- Request documentation provides additional information needed by OBM and others to effectively evaluate the request. Items that should be included in the detailed analysis and documentation of the request include:

  A. **Nature of Request**
  - What is the public need for the request?
  - What is being done now by your agency and others to address the problem/need?
  - What resources are being expended currently in the budget related to the request, i.e., dollars and positions?
  - Why can the problem not be resolved within existing resources?
  - What are the adverse impacts if this proposal is not approved? (Be realistic in this assessment.)
  - Why are current efforts insufficient?
  - How will the project be coordinated with other similar activities?
  - What is the priority of this request versus other activities in which the agency is involved?
B. Background/History
- What is the authority (state/federal law, regulation, master plan, etc.) for the program activity/service?
- What capital appropriations have previously been authorized for this project/activity and what is the status of the project if it is ongoing in nature?
- What clientele are being served; who benefits?
- What other (similar) activities, past and present, address this general area and are they effective/efficient?
- How does this project/activity relate and fit into the agency’s broader capital plan over the next six years?

C. Justification
- Will this proposal actually solve a problem, and how?
- Is each component in the proposal essential or just desirable (i.e., needs versus desires)?
- Is this a high-priority long-term need; if so, how does the proposal affect the long-term problem?
- Why is the recommended program level the correct one? Why does this have to be done now? Can it wait?
- Are or can other non-state funding sources be made available?
- Are there any legal considerations?
- Is the proposal technologically sound?
- What type of cost estimation methodology was used?
- Has the Ohio Facilities Construction Commission been consulted about the project?
- Will the proposal result in operational efficiencies and/or savings? If so, please provide a detailed description of these operational efficiencies/savings.

The request should identify what goal/objective is to be achieved and include a discussion or provide the criteria by which the success of benefits of the request can be judged.

(NOTE: This may be more relevant for some projects than others but certainly should be a consideration.)

A well-documented proposal also provides alternatives and presents an analysis on why the selected recommendation best meets the problem/need, and indicates what, if any, adverse action would result if the request were not funded. Such analysis should incorporate the assumptions/constraints, impact on benefits or quantifiable measures of effectiveness, risks and uncertainties (probability of success).
Common pitfalls to avoid include the following:

- Untimely submission of requests.
- Lack of detail relating to actual needs.
- Insufficient quantification of project need and benefit.
- Objectives unachievable, of unreasonable dimension, or not feasible.
- Expected results are too general/not specific.
- No/little discussion of viable, alternative solutions.
- Insufficient documentation and cost justification.
- Lack of overall planning or coordination.
- Lack of sound cost estimate methodology.
- No indication of priority of the request.
- Too many technical or esoteric terms.
APPENDIX B

INSTRUCTIONS FOR COMPLETING TABLE C-1

**Agency Name:** Enter the agency name.

**Agency Code:** Enter the three-digit agency code. (e.g., DNR for Department of Natural Resources)

**Division/Institution Name:** Enter the agency’s division or institution name, if applicable.

**Fund:** Enter the four-character code for the fund from which funding for the project is being requested. (e.g., 7026, or 7034, or 7035)

**Line Item Number:** Enter the appropriation line item (ALI) number in the form CXXXXX. The “X” characters are determined by the agency code and which of the following applies with respect to the project:

- Previously Funded Line Item - Funding is requested for a project that has an ALI already established in the Ohio Administrative Knowledge System (OAKS). For these requests use the number that is established in OAKS. Therefore, if a project in the Department of Youth Services already has an existing line item of C47001 that is the line item that should be used.

- No Existing Line Item - Funding is requested for a project that does not have an ALI established in OAKS. For these requests an agency should enter the characters #* after the agency code. In the event that the project is funded it will then be assigned an actual line item number by OBM. For example, if projects in the Department of Youth Services request do not have existing line items, they should be numbered as “C470#*”.

**Line Item/Project Name:** Enter a name that describes the project.

*Please keep the project name short. Do not exceed 30 spaces. The name should describe the project being requested (e.g., Renovate Central Power Plant). Please avoid non-descriptive project names such as “Phase IV Construction.”*

**Appropriation Requested:** Specify the state appropriation being requested for each biennium.

**Department Priority Number:** Assign a different priority to each project requested.

**Institution Priority Number (Institutional Agencies Only):** Each institution should prioritize its projects.

**County Name:** Enter the county name.

**County Location Code:** Use the number in Appendix C that corresponds to the location of the proposed project. Code multi-county and statewide projects as "99".
Category of Capital Improvement for 1st Biennium that Funding is Requested:
Check the one category that best describes the project in the first biennium in which
appropriations are requested. Those categories are listed below.

- New Construction
- Subsidy Capital
- Renovation
- Site Development/Land Acquisition
- Capital Equipment
- Planning
- New Construction/Major Renovation
- *Other________________________

* When using the “Other” category, please briefly explain in the space provided or as a separate
attachment if needed.

Special Project Information for 1st Biennium that Funding is Requested:
Special project information provides OBM with additional information that may be important
when evaluating capital requests. This section of the form will not apply to all projects and the
absence of “special information” will not reduce the chance of a project being funded. If a project
is needed for one or more of these reasons listed under special project information, check the
appropriate boxes and include an explanation of the special information in the narrative portion
of the Table C-1 request.

Agencies should use the descriptions listed below to determine whether or not a box should be
checked.

- **Energy Efficiency:** This box should be checked if a project or a project component is
  intended to increase the energy efficiency of the building or facility. These projects should be
  coordinated with the Ohio Facilities Construction Commission Office of Energy Services.

- **Legally Mandated:** This box is for projects that are the result of a legal mandate. Examples
  of legally mandated projects may include EPA-related, disability access, and court-ordered
  capital improvements.

- **Community Project:** This box applies mainly to MHAS and DODD, but may apply to other
  institutional agencies as well. These are projects that are partially or fully-funded by state
  appropriations, but will be owned by the local community.

- **Life & Safety:** Life and safety projects must address imminent threats to the health and safety
  of Ohio's citizens. Projects that are needed to correct safety code violations or protect against
  asbestos exposure are possible examples of life and safety projects.

- **Other Funds:** Agencies that are able to leverage federal or other non-state funds as a result of
  this project should check the "Other Funds" box.

- **Prior Funding:** The Prior Funding box should be marked if the project received an
  appropriation during the current capital biennium (FYs 2013-14), either in the capital bill
  (H.B. 482) or any other bill, as well during previous capital biennia. If the Prior Funding box
is checked, the C-1 narrative should include: the fiscal year in which the first appropriation was made, total funds appropriated for the project since the original appropriation, and an explanation of how existing funds were or will be used.

➢ **ADA:** This box should be marked only if the project is being requested *exclusively* to comply with the requirements of the Americans with Disabilities Act.

**Estimated Project Target Dates - Month and Year:**

Estimate (a) the month and year that contracts for the project will be awarded; (b) the month and year that construction will be completed; and (c) the month and year of full operation of the project. Assume the appropriations bill will become effective July 1, 2014. The Ohio Facilities Construction Commission is available to assist with determining project target dates based on project size and complexity. Contact William Ramsey at the Ohio Facilities Construction Commission at (614) 387-1270 for further assistance.

**Operating Impact for First Full Year of Operation:**

A. “Savings” Column - Estimate and enter the savings expected to result from reduced operating costs for personnel, maintenance, and equipment associated with the project in the savings column. Enter the total on the total line.

B. “Cost” Column - Estimate and enter the normal, continuing, and additional operating costs for personnel and maintenance/equipment associated with the project in the cost column. Enter the total on the total line.

C. “Funding Source” Line - Identify the source (the ALIs) of additional operating costs, if applicable. If operating costs will be saved, indicate the agency's ALIs where the savings will occur.

D. Indicate the number of additional full-time and part-time employees that will be needed as a result of the project. If the number of employees will decrease as a result of the project, indicate that loss by using parentheses [e.g., (3) FTEs].

**Estimated Costs:** Indicate all costs in the biennium for which the appropriation is being requested.

*All capital requests should be in FY 2014 dollars. Estimated costs should include all funding sources. The Ohio Facilities Construction Commission is available to assist agencies in estimating the planning, design, and construction costs with consideration of appropriate related costs and contingencies. Contact William Ramsey at the Ohio Facilities Construction Commission at (614) 387-1270 for further assistance.*

A. Include all design and planning costs (including feasibility studies, engineering analyses, and all architectural work) in this item.
B. Indicate the amount of Ohio Facilities Construction Commission (OFCC) project fees. For projects administered by OFCC, the first $4,000,000 of the construction costs is billed at 3.25 percent, the next $16.0 million ($4.0 million to $20.0 million) is billed at 1.00 percent, and any amount above $20.0 million spent for construction is billed at .75 percent. The local administration fee of 1 percent will be assessed on agency local administration projects. Under the OFCC program, colleges and universities that are certified are not assessed a local administration fee; however, colleges and universities may voluntarily use OFCC services at the new fee schedule. The OFCC fee is subject to change with each capital planning cycle.

C. Indicate the costs for site acquisition. Include amount of land to be purchased and the cost per acre.

D. Site preparation and improvement costs including the expenses of connecting, placing, or moving utilities, razing structures, and any other activities necessary to prepare a site for construction.

E. Indicate the costs associated only with the actual construction.

F. Indicate the costs associated only with the actual renovation. Do not include architectural, engineering, and equipment costs.

G. Indicate the cost of all equipment.
   - Fixed equipment should include all permanently attached fixtures.
   - Movable equipment should include all items except permanently attached fixtures.

H. Indicate any other costs that have not been listed.

I. Indicate the contingency cost percentage and the total contingency amount. Contingency costs for new construction usually amount to 5 percent of construction costs. Contingency costs for renovation projects range from 8 to 10 percent of construction costs.

Indicate the total. This total may not match the appropriation request, because the total represents all funds, while the appropriation request represents only those funds appropriated by the state.

Total Estimated Project Costs by Source of Funds:
- Indicate the requested state appropriation for each biennium.

- If the total estimated project cost is more than the requested state appropriation, indicate the source(s) of the funds and the dollar amount that will be contributed by those sources.

Reminder: Attach a narrative to each Table C-1. The content of the narrative is described in the section titled “Table C-1 Narrative” and is located on page 9 of the guidance for institutional agencies and on page 6 in the guidance for non-institutional agencies.

APPENDIX D

INSTRUCTIONS FOR PRIORITY SUMMARY

Agency: Enter the agency three-character code.

Agency Priority: Enter the agency priority number for each Table C-1.

Div/Inst.: Enter the division or institution name.

Div/Inst. Priority: Enter the division or institution priority number for the project as shown on Table C-1.

Fund: Enter the three character code for the fund as shown on Table C-1.

Line Item/ALI: Enter the line item number as shown on Table C-1.

Type: Enter the project type code using the following scheme:
1 = New Construction
2 = Subsidy Capital
3 = Renovation
4 = Site Development and Land Acquisition
5 = New Construction/Major Renovation
6 = Capital Equipment
7 = Planning
8 = Other

See Appendix H for a definition of each type of project.

Project/Line Item Name: Enter the project name as shown on Table C-1.

1st Biennium: Enter the requested appropriation for the 1st biennium.

Scenario A: Enter the requested appropriation for the 1st biennium using Scenario A funding, if applicable. This item only applies to the 1st biennium.

Scenario B: Enter the requested appropriation for the 1st biennium using Scenario B funding, if applicable. This item only applies to the 1st biennium.

2nd Biennium: Enter the requested appropriation for the 2nd biennium.

3rd Biennium: Enter the requested appropriation for the 3rd biennium.

OBM may give some agencies one or more funding scenarios for the first biennium. Agencies that receive scenarios will need to complete the “Scenario A” column as well as additional scenario columns.
<table>
<thead>
<tr>
<th><strong>County Code</strong></th>
<th>Enter the county code for the county in which the project is located.</th>
</tr>
</thead>
</table>

**Note:**
- Agencies must prepare a list of its requested projects in priority order using the spreadsheet format that OBM has prepared. OBM will provide the spreadsheet in an Excel format and agencies should contact their OBM analyst to get this file.
- A printed copy of the priority summary and a copy of the spreadsheet file in electronic format must be submitted as part of the agency's capital plan.
- OBM analysts may also consult with the Ohio Facilities Construction Commission to discuss and evaluate an agency’s submission and formulate recommendations.

**Special Spreadsheet Considerations:**
- Please do not change the file’s column widths or numeric formatting. Make sure that the spreadsheet file that is submitted to OBM is saved as an Excel file. If you have a problem saving the spreadsheet file as requested, please notify your OBM budget analyst.
Overview

The Ohio Revised Code and each capital bill and capital re-appropriation bill (the most recent being H.B. 482 and S.B. 312, respectively) set forth the allowable uses of capital funds. Capital appropriations for buildings or structures, including remodeling and renovations, are limited to:

- Acquisition of real property or interests in real property (i.e., the purchase of land or easements).
- Buildings and structures, which includes construction, demolition, complete heating, lighting and lighting fixtures, and all necessary utilities, ventilating, plumbing, sprinkling, and sewer systems.
- Architectural, engineering, and professional services expenses directly related to the project (including feasibility studies).
- Machinery related to the operation or functioning of the building or structure at the time of its initial acquisition or construction.

The State must own the property on which the capital facility will be located. In certain situations such as projects involving higher education institutions and county boards of developmental disability, the ownership requirement may be waived if:

1. The State or higher education institution owns the property or has a long-term lease (at least 15 years for state agencies and 20 years for higher education institutions), or other interest (such as an easement) in the property;
2. The Board of Regents on behalf of a higher education institution certifies to the Controlling Board that undue delay will occur if planning does not proceed while the property or property interest acquisition process continues. In this case, capital funds may be released upon approval by the Controlling Board to pay for planning through the development of schematic drawings only; or
3. If the capital facilities will be owned or be part of facilities owned by a separate nonprofit organization or public body and made available to a higher education institution or state agency for its use, the nonprofit organization or public body either owns or has a long-term lease (at least 15 years in the case of state agencies and 20 years for higher education institutions) of the real property or other capital facility to be improved, renovated, constructed or acquired and has entered into a joint/cooperative use agreement with the state agency or higher education institution that meets applicable statutory requirements.

Joint/Cooperative Use Agreements -- the Board of Regents has adopted rules (see OAC 3333-1-03(E)) regarding the release of capital moneys for joint or cooperative use projects. The related agreements, among other matters, must:

- Specify the extent and nature of the institution’s use over a term of at least 20 years for higher education institutions and at least 15 years for state agencies, with the value of that use or right to use to be reasonably related to the amount of the State capital appropriation.
- Provide for pro rata reimbursement to the State should the arrangement for joint or cooperative use be terminated early.
• Provide that procedures to be followed during the capital improvement process will comply with applicable state laws and rules, including capital bill provisions.

• Provide for payment or reimbursement to the higher education institution (not to exceed 1.5% of the appropriation) of its administrative costs incurred as a direct result of the project. The institution should document those reimbursed amounts by component.

**Allowable Equipment and Furnishings**

To be financed with capital funds, expenditures for equipment or furnishings that are part of a broader project or facility must meet all of the following criteria:

• Essential in bringing the facility up to its intended use and necessary for the facility to function. The equipment or furnishing must be an integral part of or directly related to the basic purpose or function of the facility.

• Have a unit cost of at least $100.

• Have a useful life of at least five years.

• Used primarily in the rooms or areas covered by the financed project.

Allowable equipment and furnishings would include computers and computer peripherals, workstations, lab and research equipment, desks, chairs, tables, bookshelves, file cabinets, carpeting/flooring, blinds, and curtains provided that they satisfy all of the above criteria. An appropriation item specifically for equipment is allowable provided the equipment meets the above unit cost and useful life provisions.

**Non-Allowable Equipment and Furnishings**

• Not integral to the broader project or the facility’s intended use.

• Motor vehicles of any kind (e.g., cars, trucks, modified vehicles).

• General supplies and low-cost equipment (unit cost of less than $100).

In most cases, equipment or furnishings being purchased as part of a regular maintenance, upgrade or replacement effort is not appropriate for capital funding. Consumable supplies and low-cost equipment such as fuel, oil, adding machines, calculators, trash cans, common tools, paper stock, staplers, tape dispensers, etc. are not eligible uses of capital funds.

**Maintenance/Repairs versus Renovations**

• Maintenance and repairs, including maintenance contracts, are not eligible to be paid from capital funds and, thus, must be covered by operating funds.

• Maintenance includes the routine recurring activity undertaken to maintain the operation, functionality, appearance or safety of a piece of equipment, building or structure. Repairs are short-term maintenance projects that fix a known problem. Examples of repairs include: replacing a part or component of the heating or cooling system, fixing a leaky pipe, patching a wall, mold remediation, replacing sections of flooring or ceiling tiles, and glass replacement.

• Renovations are more extensive enhancements, upgrades, or replacements of buildings or structures or systems and are an appropriate use of capital funds. Examples include renovations of classrooms or other space into computer or research laboratories.

**Leases, Lease-Purchase, and Installment Purchases**

• Leases and lease-purchases of vehicles or equipment are not allowable capital expenditures.
Allowable Capital Expenditure Guidelines

INFORMATION TECHNOLOGY (IT) SYSTEM PROJECTS

Capital funds may be used to support the acquisition, development, deployment or integration (including project management) of information technology systems that constitute or are an integral part of approved capital projects. Capital funds may not be used to support the ongoing operation and maintenance of such projects.

ALLOWABLE

Hardware

Capital funds may be used to purchase computers (including personal computers) and related peripherals such as servers, mainframes, printers, scanners, fax machines, etc.

Software

- Software development and design (akin to facility design and engineering).
- Purchases of packaged “off-the-shelf” software are allowable if they have an expected useful life of at least five years and meet one of the following criteria:
  - Related to the initial deployment of an agency or university-wide system or other major project deployment (periodic upgrades must be purchased with operating funds); or
  - When necessary to bring a newly constructed facility or an allowable piece of equipment up to its intended use (e.g. a computer lab).
- Software licenses with a term of at least five years.
- Purchase of perpetual licenses enabling the acquisition of shared electronic resources and databases.

Personnel Expenses

Capital funds may be used to support personnel costs related to the initial development and deployment of an information technology project. Employees splitting time between the new information technology project and other work or only temporarily assigned to the IT project should continue to be funded out of operating funds.

NON-ALLOWABLE

Training and Maintenance

Expenses related to training of personnel on the new IT system or any of its components is generally not an allowable capital expenditure. Additionally, operating, not capital, funds must be used to support the ongoing maintenance and operation of IT systems or other regular, recurring expenses.

Software

Capital funds generally may not be used to purchase standard off-the-shelf software (such as MS Office software, Adobe, and web browsers) or any software package with individual license costs under $500. Additionally, capital funds may not be used to purchase software upgrades.
**Personnel Expenses**

Capital funds may be used to cover only those labor expenses directly related to the initial development and deployment of a capital project. They may **not** be used to fund ongoing maintenance and operational expenses of a project once it is developed. In the case of colleges and universities, capital funds may **not** be used to cover tuition reimbursement or graduate assistantships.

**Follow-Up Questions Regarding Proposed Expenditures**

- Questions regarding the capital funding eligibility of proposed expenditures should be directed to the agency’s operating and capital analysts at the Office of Budget and Management.

- Institutions of higher education should consult with the capital planning Director of the Ohio Board of Regents.
APPENDIX F
CAPITAL FACILITIES MANAGEMENT SURVEY

Agency: ________________  Contact: ________________
Phone: _________________  Email: ________________

Please answer the following questions pertaining to your agency’s capital facilities management. You may provide answers directly on this form or on a document you create. If you create your own document, please be sure to include the agency name and the name and phone number of a person that can answer any questions about the agency’s responses to the survey questions.

Does the agency maintain a complete inventory of capital facilities?  Yes  No
If so, how often is the inventory updated?

Does the inventory include information about the condition of the facilities?  Yes  No

Does the agency maintain a space utilization inventory of its facilities?  Yes  No
If so, how often is it updated?

Has the agency completed a master plan for its facilities, to include program, function and occupancy needs?  Yes  No
If so, what is the date of this plan?

Does the agency have pre-determined maintenance schedules for capital facilities?  Yes  No
If so, how are such maintenance schedules determined?

How consistently is capital maintenance performed according to such schedules?

Does the agency track items that could be considered deferred maintenance?  Yes  No
If so, does the agency prepare a dollar estimate regarding the cost to perform such maintenance?  Yes  No
If the agency tracks estimates of deferred maintenance, what is the current estimate of the agency’s total deferred maintenance?

If the agency has identified deferred maintenance, what are the primary factors driving it? (e.g. lack of funding, age of facilities, etc.)
Does the agency conduct regular condition assessments of capital facilities?  

Yes  No

If so, who conducts condition assessments (e.g. institutional personnel, central office, contractor)?

How often are condition assessments done?

When undertaking a project funded with capital appropriations, does the agency use performance measures to track progress (timelines, cost)?  If so, please provide an example.

Does your agency use the OAKS Asset Management System to report fixed asset inventory information to the Department of Administrative Services?  

Yes  No
APPENDIX G
PERCENT FOR ARTS PROGRAM

Purpose of Percent for Arts Program
The General Assembly has declared it a policy of this state that a portion of the money to be spent by state agencies on the construction or renovation of public buildings pay for the acquisition of works of art to be placed in or on such buildings. In pursuit of this policy, the per cent for arts program, has been established under which quality works of art are to be sold to such agencies by the Ohio Arts Council and, in the process, qualified professional artists are to be recognized. (Section 3379.10 of the Revised Code.)

Provisions of Percent for Arts Program

Applicability
The program is applicable, unless otherwise exempted, whenever more than $4.0 million of state money, whether obtained from the sale of bonds or otherwise, is to be spent by a state agency on the construction or renovation of a public building. Certain types of projects do not meet the definitions of public building or renovation listed below.

Responsibility of State Agency
The state agency shall contract with the Ohio Arts Council to use one percent of the state money to purchase works of art from the Ohio Arts Council for display in or on the public building and to make related outlays.

Calculation of $4.0 Million
The calculation of whether $4.0 million is to be spent shall not be cumulative but shall be based on the amount of each appropriation or each designation of non-appropriated state proceeds of bonds, notes, or other obligations authorized to be sold for a project.

Definitions
Appropriation does not include reappropriations.

Public Building means any building, facility, structure, or park built or renovated using state moneys, including any publicly owned lands or space surrounding or integral to the building, facility, structure, or park but not including:
- Parking lots, sidewalks, maintenance sheds, bridges, tunnels, sewers, trails, fishponds and fishways, or warehouses, unless such structures are adjuncts of the principal element of the project;
- Buildings of a temporary nature;
- Projects to correct any deficiencies or violations of a building or housing code enacted by law;
- Highway construction.

Renovation does not include a project of which the principal purpose
is the rehabilitation of plumbing, heating, ventilating, air conditioning, or electrical systems.

**Determination/Reconsideration**

The Director of the Office of Budget and Management makes all final decisions about whether a project is subject to the Percent for Arts program. The Director, after consulting with the Ohio Arts Council, may determine that no state money or less than one percent shall be spent for the Percent for Arts program on the basis that:

- Works of art would be out of place in or on the public building or if there would be little opportunity for public appreciation of works of art in or on the public building.
- The value of some features or characteristics inherent in the architectural design of the public building should apply toward the one-percent requirement.
- The public housing is or will be amply supplied with works of art even without works of art purchased from the Council.

A state agency may ask the Director of OBM to reconsider his determination and may submit additional relevant information to the Director as outlined in Rule 126-4-01 of the Administrative Code.

**EXAMPLE:** $5.0 million is appropriated to a state agency for the construction or renovation of a public building.

$50,000 of the appropriation shall be designated for the Percent for Arts program, unless the Director of OBM, after consulting with the Arts Council, determines that less than one percent or none of the appropriation shall be spent for the program.

**Arts Council**

Specific questions about the acquisition, commissioning, and installation of works of art under the Percent for Arts program should be directed to the Ohio Arts Council at 466-2613.
APPENDIX H
DEFINITIONS OF PROJECT TYPE

Projects requested and or funded as part of the capital planning and budgeting process generally can be assigned to one of several categories that best describes the type of project that it is. Agencies and institutions should use these project types in completing the Table C-1 as well as the agency Priority Summary. The categories as assigned for the FY 2015-2020 capital planning process are identified and described below:

1) **New Construction** – Appropriations for new facilities or substantial enlargement/addition to existing facilities. Examples are a new mental hospital, a wing added to a university library, or the construction of a new cell block at a state prison.

2) **Subsidy Capital** – These are general capital appropriations provided to non-state entities to undertake capital projects. These appropriations are not made specific to any individual project but are instead made in a lump sum with the agency then allocating the funds to other entities who undertake the project. Examples of this are PWC Infrastructure, School Facilities Commission (SFC) projects, Clean Ohio, and Third Frontier Wright Centers.

3) **Basic Renovations/Major Maintenance of Facilities** – These are appropriations for improvements to existing facilities that are limited to renovations, enhancements, security improvements necessary to keep the facility in good working order. Examples are roof replacement, window replacement, security upgrades, energy improvements, and plumbing and HVAC replacement.

4) **Site Development/Land Acquisition** – These are appropriations for acquisition of either real property or infrastructure. Examples of this would be appropriations for the acquisition of major new equipment for existing facilities, site improvements (including utility lines replacement or installation), and land acquisition.

5) **New Construction/Major Renovations to Existing Facilities** - Appropriations for major overhaul of existing facilities to enhance or increase their usefulness or to modify their use to a new purpose. An example is gutting and remodeling of an office building in order to change its uses.

6) **Capital Equipment** – Appropriations to acquire eligible capital assets necessary in order for a newly constructed or renovated facility or asset to function properly. This would include items such as HVAC systems, loose furnishings in a newly constructed facility.

7) **Planning** – Appropriations that would support planning and design costs necessary to undertake the acquisition or construction of a capital facility or asset.

8) **Other** – Any project not sufficiently defined by any of the above project types.
APPENDIX I
DIRECT AGENCY SUPPORT
OHIO FACILITIES CONSTRUCTION COMMISSION

The Ohio Facilities Construction Commission (OFCC) provides several supportive opportunities to agencies and institutions during the capital planning and budgeting process. The level of support may likely vary between agencies and institutions and types of capital requests. The opportunities described below can be utilized individually to provide specialized support for a specific capital request development need or concurrently to provide a comprehensive level of support throughout the capital planning and review process.

**Six-Year Capital Improvements Plan Development**

OFCC can review and update the agency or institution’s current six-year capital improvements plan. This review and support will be accomplished through the following activities:

- Review the age and useful life of the building/facility. This review will determine if the building’s age and infrastructure would support long-term capital improvements or if the building is nearing or at the end of its useful life.
- Evaluate the scope of the capital budget requests contained in the agency or institution’s plan. This review will determine the impact to the existing facilities and infrastructure, and confirm that all necessary related activities (for example, ceiling tile and light replacement where mechanical systems are being replaced above ceiling, site preparation for new construction, etc.) have been included.
- Confirm that the capital requests within the plan meet the criteria of “capital construction” versus “maintenance or repair.”
- Evaluate and recommend cost and schedule revisions.

**Capital Request Technical Support**

OFCC staff can provide technical assistance during the development of the capital budget request. This assistance can include the following:

- Complete a cursory assessment of the facility addressed in the capital request to determine appropriateness for work requested and completeness of scope and impact to the facility.
- Confirm completeness of capital request documentation, including description of the scope to be completed, schedule for completion, justification of the work, and inclusion of supporting documentation.
- Evaluate the capital request against the agency’s six-year capital improvements plan to confirm appropriateness and recommend where additional justification is needed.
- Confirm cost estimates and schedule timelines and advise where
revisions and adjustments of requests are required. Evaluate cost estimates to determine the complete project costs, including demolition costs (if applicable), project fees and assessments, furniture and equipment, and program specific costs.

- Assist the agency when requested.

### Prioritization Assistance

OFCC can assist with technical and professional support to develop project selection criteria during the prioritization process. The criteria will be made based on a number of factors, including:

- Projects that present the best long term value, through extending or supporting the current useful life of the facility where the project will be completed. This may be achieved through improving the efficiency of the facility, operation and/or program that the project will support, or other factors as presented within the justification of the capital request.
- Projects that take advantage of shared sites and facilities within current agency or other agencies, thereby reducing capital infrastructure and project costs. The project may also provide opportunities for increased efficiencies in operations and program costs within or between agencies.
- Projects that improve the energy and utilities efficiencies for the facilities and improved space and occupancy utilization.
- Projects that protect the asset such as roofing and building envelope.
- Projects that ensure the safety of the occupants.

OFCC’s assistance will help in creating a thorough request and in establishing consistency across all agencies to support a uniform review and prioritization process. While final priority selection and capital request approval will be determined by Office of Budget and Management, OBM may consult with OFCC to discuss and evaluate specific submissions and formulate recommendations.
